

Step 1: Login to orkin.com. On top change from English to Spanish.

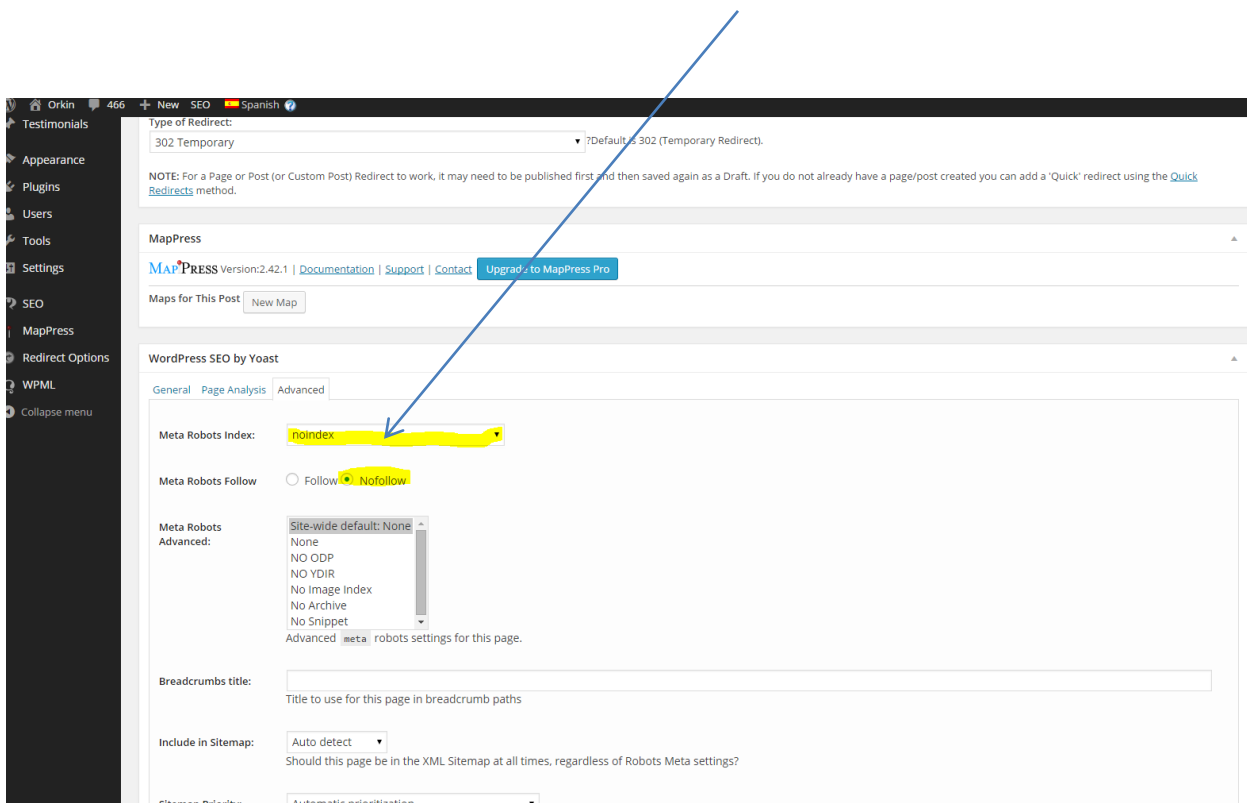

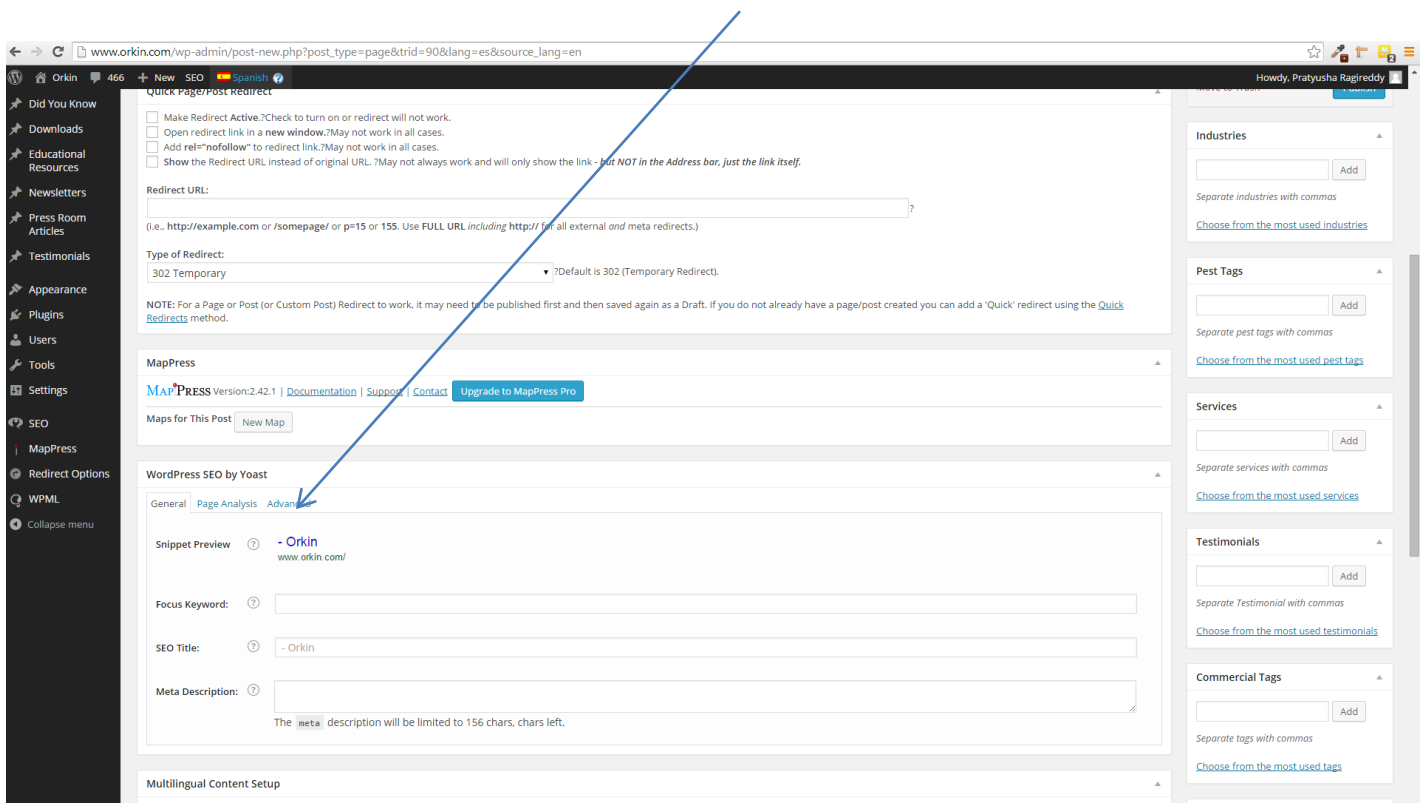

Step 2: just dump all the pages from Spanish site “es.orkin.com” to here under the residential Default template. Commercial pages under commercial default template.

Step 3: after adding the content. Stay in the same page and add Meta data, along with this change the no follow, no index too.

No follow no index: go to advanced tab and change the Meta index robot and Meta index follow.

Make sure you do it for each and every page of Spanish site. This way we can block the pages from indexing.
